

Financial Manager

By Karl Hickel and Josh Anderson

Problem to Solve

- Finances can be difficult to track and organize
- Not having access to electronic copies of transactions
- Having a lack of visualization that gives detailed analysis about transactional history.

Solution

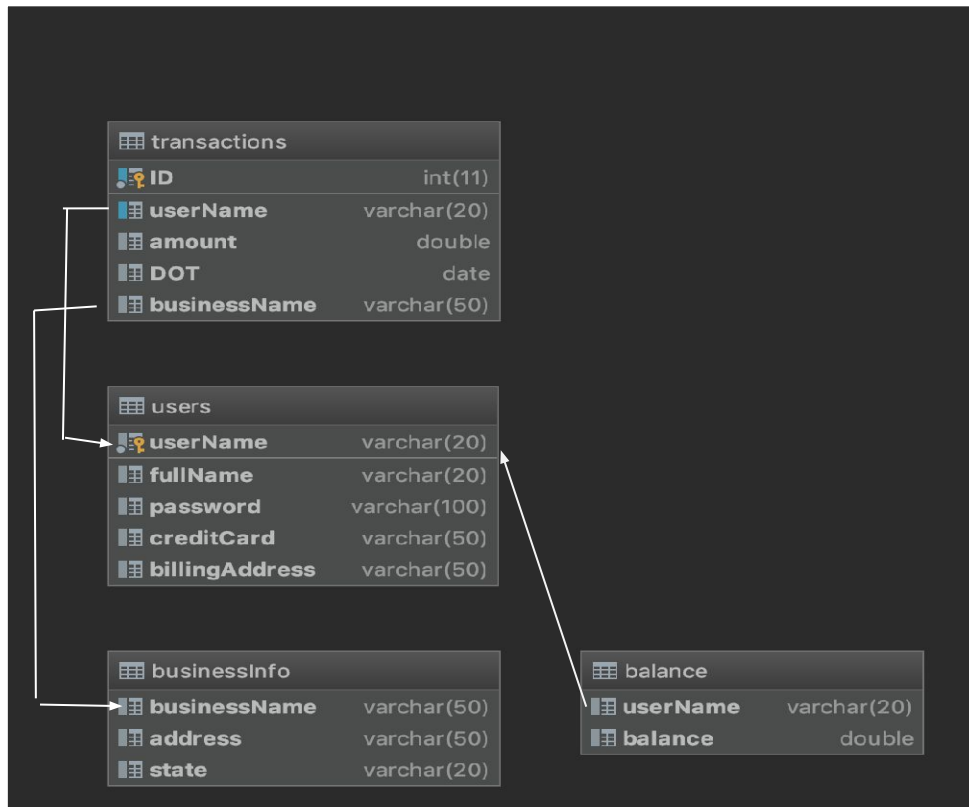

- A web application that can be accessible at any time
- Tool to be used for financial organization and analytics
- Quick access to history and visual analytic for users

Schema

Finishing The Project

- 1 Query from 3 tables
- Implement Rollback
- Insert/Delete row in transactions table (procedures in database)
